And Better Still. Almost everyhedy knows the high value of the American Agriculturist a journal that has just completed its 27th successful year. It is a large, beautiful journal, full of plain, practical, reliable, most useful information, for every man, woman and child. It prints every year 700 to 500 original engravings of labor-saving, labor-helping contrivances many of them home-made; also of unimals, plants, construction of bulldings, etc., etc. The American Agriculturist also constantly publishes exposures of the various humbugs and swindlers that prey upon the people with their artful schemes. These expen-ures save tens of thousands of dollars to its renders every year.

With all its splendid features, and an outlay of over \$25,000 a year in collecting and preparing information, engravings, etc., the circulation is so large that it is supplied to subscribers, post-paid, for only \$1.50 each year.

We are happy to announce that we have unde arrangements to furnish to eash subscribers, BOTH the Counter and the American Agriculturist, for the small sum of only \$2.05 a year, both post-paid, which is but a trifle over five cents a week. Who will not smoke one eight less a week, or save five cents from some other ueedless expenditure, if necessary, to constantly supply himself and family with both of these journals? Remember, only \$2.05 pays for the Country and the American Agriculturist, both sent post past for a whole year. Please tell your neigh-

And Still Better. The publishers of the American Agricult. turest have secured Marshall's new, large, magnificent Steel Plate, "fur Farmer's I'RIDE," one of the finest works of this great artist, whose pictures of Washington and Lincoln are of world wide reputation. So fine is this new work that Mr. Marshalt received \$3,000 for engraving the steel plate alone. It was so highly valued that thirty good judges subscribed \$25 each for 30 copies of the first or artist proofs, and no copy of the picture can be bought for less than \$5.00.

But the publishers of the American Agriculturist, have just secured the Plate, and baving large facilities for multiplying it, they propose to present this Splendid Engraving, on fine Plate paper, (22x28), PRINTERS. delivered post paid, to every subscriber for volume 38 of that Journal, who sends its extra to rover cost of packing, mailing, and postuge on the cugraving.

THE LATENT INVENTION IN USE-TUL HOUSEHOLD ARTICLES. Within the last row years there has been expended a great deal of inventive thought and genius upon what may properly be classed as household articles, the most noted results of which are the praduction of the sewing machine, the wringr, the washing machine, the carpet sweeper, &c. Almost every week wo chronicle the advent of some new invention by which the cares and fabors of housekeepers are lessened and woman's

nousekeepers are lessened and worsan's twork made easier.

The newest thing to challenge our attention and glorien the heart of the housekeeper s, what is called the Novelty Brush tolder, Carpet Streither and Sweeper a very simple contrivance de signed to firmly hold in position any kind a brush or duster; having an extension handle that enables one to wash or dust windows, walls or ceilings without the sid of a step ladder. That is one of its conveniences, and it is also one of the bost carpet awcopers in the market, holding the brush firmly at an angle. It cleans the carpet thoroughly, raises no dust, and does not wear the carpet like the ordinary broom or brush, and will outwear a half dozen brooms. As a handle for the scrubbing brush it is the best device ever made, no more kneeling on the floor, no more back aches or soro fingers. As a carpet stretcher it is worth Letter Heads, its cest, as a carpet of any size can be laid evenly without any of the labor and rexation usually attending such cork. It is strong, simple, thoroughly made, cannot get out of order, has so screws,

lever or hinges, is compact, chesp and It is manufactured by Brown & Co., Cincinnati, the well known manufacturers of useful household articles, and is sold only by their agents to housekeepers. The real utility of this article will at once be seen by those most interested, and we predict for it a large sale. Every housekeeper in the land will want one. HICKMAN : : KENTUCKY. LICHTNING SEWER

THE NEW WILSON Oscillating Shuttle SEWING MACHINE is wonderful in its conception, unprecedented for doing a large range of sewing in textile fabrics and leather. Its mo-

tions are continuous, admitting of an extraordinary rate of speed, either by steam or foot power. Every motion of the treadle makes six stitches, thus producing about one-third more work in a day than other needle out of the fabric. It uses the wellknown Wilson Compound Feed on both sides of the needle. It has

two-thirds less parts than any other first-class Sewing Machine. Its arm is fully eight and one-half inches long and five and one-half Inches high, and the whole Machine is very compactly and scientifically constructed in proportions, elegance, design and appearance. Its simple, powerful and perfect mechanism places it as far in advance of all other Sewing Machines as the telephone is superior to the tin speaking tube. The WILSON MENDING ATTACHMENT, for repairing all kinds of textile fabrics WITHOUT PATCHING, furnished FREE with all WILSON SEWING MACHINES. Prices furnished with freight charges prepaid, and machines furnished on trial to responsible parties, to be used with steam-power, in places where we have no agents. Send for Illustrated Catalogue and Prico List, No. 230.
